INHALATION:

Remove the victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Keep the affected person warm and at rest. Get medical attention immediately.

EYE CONTACT:

Immediately and thoroughly flush the eye with large amount of water for at least 15 minutes. Get medical attention. If not removed promptly, this material may cause serious eye damage. Part eyelids with fingers to assure complete flushing. Check for and remove contact lenses if easily possible.

SKIN CONTACT:

Remove contaminated clothing and shoes. Immediately wash skin with plenty of water and soap and get medical attention.

INGESTION:

Do not induce vomiting. Get medical attention immediately. Rinse the mouth with water if possible. Never give anything by mouth to an unconscious or convulsing person.

5. FIRE FIGHTING MEASURES

FIRE AND EXPLOSIVE PROPERTIES: See Section 9

EXTINGUISHING MEDIA: Water fog, dry chemical, foam, CO₂, dry sand

EXTINGUISHING MEDIA WHICH MUST NOT USED: Water jet

GENERAL HAZARD:

Flammable liquid and vapor. Vapors may form an explosive mixture with air. The vapor is heavier than air and can accumulate near the ground.

FIRE FIGHTING INSTRUCTIONS

Keep unnecessary and unprotected personnel away. Shut off supply if possible. Remove containers to safe place if possible. Keep containers and surroundings cool by spraying with water. Fight fire from an upwind position.

FIRE FIGHTING EQUIPMENT

Respiratory and eye protection required for fire-fighting personnel.

Full protective equipment and a self-contained breathing apparatus (SCBA) should be used for all indoor fires and any significant outdoor fires.

HAZARDOUS COMBUSTION PRODUCTS:

Carbon oxides

6. ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS:

Evacuate immediate area. Warn personnel of fire, explosion and health hazard.

Wear appropriate personal protective equipment as specified in Section 8.

Remove all sources of ignition. Keep upwind, evacuate people downwind.

ENVIRONMENTAL PRECAUTIONS:

Do not let this chemical enter the environment.

CLEAN-UP METHODS:

Use non-sparking tools and equipment. Absorb or cover with dry earth, sand or other non-combustible material and transfer to sealable containers.

Large spills: Dike far ahead of liquid spill for later disposal.

7. HANDLING AND STORAGE

HANDLING

Technical Measure:

Use only with adequate ventilation. Keep away from heat, sparks, and flame. Use explosion proof electrical equipment. Take precautions against build-up of electrostatic charges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. This material can form explosive mixture with air. Beware of vapor leaks. Avoid contact with eyes, skin and clothing. Wear appropriate personal protective equipment. Provide hand and eye wash station near work area. Wash thoroughly after handling.

Precautions:

Use only under local exhaust or general ventilation.

Safe Handling Advice:

Use explosion-proof (ventilating, lighting and material handling) equipment. Take precautions against build-up of electrostatic charge.

STORAGE:

Storage Conditions:

Flammable liquid. Protect from direct sunlight. Keep away from heat, flame and all sources

of ignition. Stoke in well-ventilated area. Keep container tightly closed. Stoke in a segregated and approved area.

Packing Material:

Stainless steel, or plastic such as polyethylene, FRP

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS:

The use of closed system or local exhaust ventilations is recommended. Provide general ventilation. Provide safety shower and eye wash station near working area.
